

**RED WING** 

**POLICY & PRACTICE  
PROJECT**

**Improving inequitable systems so  
government works better for everyone.**

Mapping Activity – Meeting #3

**The Advisory Team is following a process called the  
“Roadmap for Exploring New Models of  
Funding Public Safety.”**

*(Document is on the web page.)*

**The first step of that roadmap calls for finding out what services might replace or assist law enforcement in some capacity.**

## **WHY?**

- To help take some burden off the shoulders of police so they are allowed to do their most important work.**
- To allow other community experts to play a role**
- To better serve community members in their time of need.**

**The first step in finding out what services might assist or replace law enforcement in some way is examining the current *public safety service demand.***

**To do that, we will start to study data and continue to study data over the course of this project.**

**This will include:**

**--Calls for service to the police from the community**

**--Officer-initiated activity with the community**

**This will help inform the community as we start to learn and discuss how Red Wing wants to invest its resources to make public safety the best it can be.**

# Red Wing Police Department Beats
