

What are the Benefits of my Ash Tree?

The environmental and economic value of trees is well documented. Mature ash trees provide a significant amount of valuable tree canopy in our community. For example, an average ash tree in Red Wing will:

Intercept about 1,200 gal. of stormwater annually

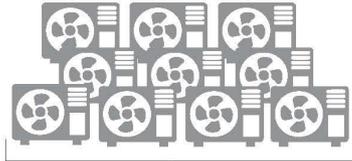

» **Reduce** storm flooding & keep **pollution** from rivers and lakes.

» **Reduce CO2** in the atmosphere by **600 lbs+** every year.

=

10 a/c for 20 hrs/day

» **Produce** the cooling effect of **ten** room-size air conditioners operating **twenty** hours a day.

Ash trees are valuable within the community

The value of property can drop along with the beauty of the neighborhood when ash trees are lost.

What are the Advantages of Red Wing's Program?

- The city has ensured that Rainbow Treecare meets the high standards required for a contractor.
- Rainbow Treecare has fulfilled the city's requirements on staff training, years of experience, and number of licensed applicators on staff.
- You can sign-up for an inspection with Rainbow Treecare any time of year.
- You will receive a property visit and consultation with an ISA certified arborist or a certified tree inspector.
- Ash tree protection is offered at a discounted rate as part of this city partnership.
- Our entire community benefits from the mature canopy preserved through city and homeowner
