

This guide is for visitors within 10 miles of the Prairie Island Nuclear Generating Plant. It provides instructions for what to do in the unlikely event of an accident.

If the sirens sound:

If a siren is activated for an emergency at the Prairie Island Nuclear Generating Plant, an Emergency Alert System (EAS) message will be broadcast immediately.

Sirens may also be activated for weather warnings so it is important to listen to the radio.

Local EAS radio stations listed below will give up-to-the-minute information on what to do and where to go. In the following list, all are on the air 24-hours a day.

KCUE Red Wing	1250 AM
KWNG Red Wing	105.9 FM
WCCO Minneapolis	830 AM
KNOW (MPR) St. Paul	91.1 FM
KDWA Hastings	1460 AM

It is important to:

- Stay calm.
- Gather the people in your group.
- Go to your vehicle or nearest building.
- Tune to your local EAS station.
- Listen for instructions.
- Use your telephone for emergency calls only.

If you are told to evacuate:

Evacuation is a precautionary move recommended for your well being. You will have time to pack your belongings and load your vehicle. Keep these guidelines in mind:

- If at all possible, use your own transportation.
- Drive safely, using the routes shown on the Reception Center Map. Tune to one of the EAS stations for updated information.
- Keep your windows and vents closed while driving in the 10 mile emergency planning zone. See map.
- Follow the directions provided over the EAS stations. Reception Centers are established for purposes of monitoring evacuees and to help find short term housing and feeding, if needed.
- During a General Emergency while evacuating, you will be directed to take potassium iodide (KI) if you have it. Do not delay your evacuation to locate or administer KI.
- You and your family will be advised when you can reenter the evacuated area. State and local officials will make this decision.

If you are told to shelter-in-place:

- Remain there until further notice.
- Close all doors and windows.
- Turn off all ventilation systems that might draw in outside air (heating and air conditioning).
- If you must go outside to warn a friend or family member, limit your time to an hour or less. Cover your mouth and nose with a wet cloth while you are outside. If you must go outside and are exposed to a radioactive release, go inside, remove your clothing, place it in a plastic bag, and take a shower.
- During a General Emergency while sheltering-in-place, you will be directed to take potassium iodide (KI) if you have it. Do not delay your sheltering to locate or administer KI.

In the Prairie Island plant area, you should call these numbers for non-emergency information:

- Dakota County Emergency Management Director(651) 438-4703
- Goodhue County Emergency Management Director (651) 267-2640
