Highway 61 (Main Street) Project – Watermain Utility Work

(May 11, 2015, Red Wing, Minn.) – The City of Red Wing and the Minnesota Department of Transportation (MnDOT) would like to inform you that watermain utility work consisting of the general operation of existing gate valves located within TH 61 between Old West Main and Broad Street is planned to take place as necessary the rest of this week. The work is intended to be short in duration and may require temporary traffic shifts along TH 61 as directed by construction flaggers. As such travel delays are expected and motorists are requested to exercise patience when traveling through the construction zone.

Interested in receiving periodic e-mail updates for the TH 61/Main Street Reconstruction project? Send an e-mail request to hwy61.reconstruction@ci.red-wing.mn.us, and we'll add your name to the project update list.

Motorists are encouraged to stay alert and drive carefully through all work zones and use detour and alternate routes whenever possible. Questions may be directed to Jay Owens, City of Red Wing Engineer, at 651-385-3625. Visit the project website for additional information <http://www.red-wing.org/th61home.html>
