PROJECT UPDATE

The traffic control shifting the southbound TH 61 traffic to the north in order to allow for the construction to start between Dakota and Broad Street was completed today.

The Contractor plans to start the construction of Stage 1 this week with the southbound lanes of TH 61 to be constructed first. The Contractor will work on the removal of the existing pavement starting at West Ave and working west thru Dakota Street. Immediately following the pavement removal the Contractor plans to start with the installation of the sanitary sewer starting at the new downstream sanitary sewer manhole located in West Avenue and continuing with the installation of the new sanitary sewer main heading west.

Additionally construction of the temporary signal system at Franklin and Fulton Street will continue to progress, along with the installation of the temporary water system along both sides of TH 61. The temporary water system acts as a replacement of the underground water pipes to allow the Contractor to replace the permanent underground system without disrupting the water service.

Lastly wanted to provide a reminder of the proposed overall Stage 1 construction sequencing for the summer of 2015. Construction will be focusing on southbound TH 61 first starting at West/East Avenue and working west towards Old West Main Street. Once this portion is completed, construction will flip and focus on northbound TH 61 starting at Old West Main Street and working east towards Broad Street.

We thank you for your patience and cooperation.
