

Interior

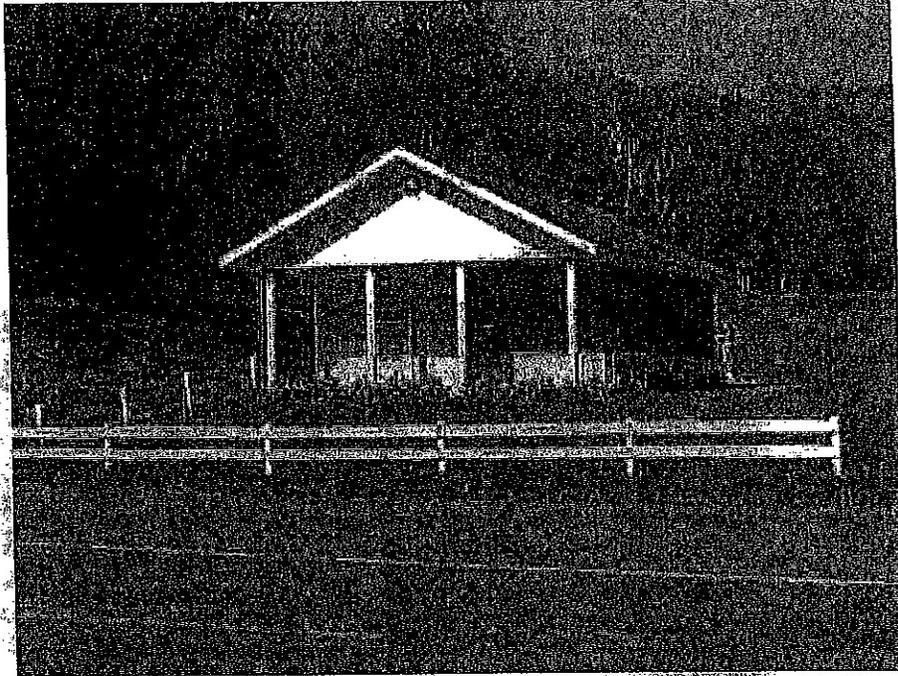

**Driving Range Shack:**

The driving range is located across Golf Links Drive from the maintenance building and equipment storage shed. A cart access to the golfing range from the clubhouse is via a paved trail through the woods (see photograph).

This building was constructed in 1992 and contains approximately 420 square feet of building area, including a 240 square foot screen porch and 180 square foot vending area. There is also a 120 square foot open, covered front porch and 60 square foot open, covered rear porch area. This building has vinyl exterior siding and a gable style roof with asphalt shingle roofing. This building is in average condition.

The driving range itself extends approximately 300 yards north of the driving range shack. There are four metal poles each equipped with four light fixtures to allow for nighttime practicing.

Path to driving range

**Other Structures:**

The Tee House building, which contains about 400 square feet, is located near #6 of the Tournament course. This is a small, wood frame constructed structure that includes a 3-fixture restroom and vending area, along with a small storage space. There is electric power to this facility and it includes a wall air conditioner unit. The exterior siding is vinyl and the gable style roof has asphalt shingling. The storage room is the control room for the irrigation system. There is a separate water and septic that serves this building.

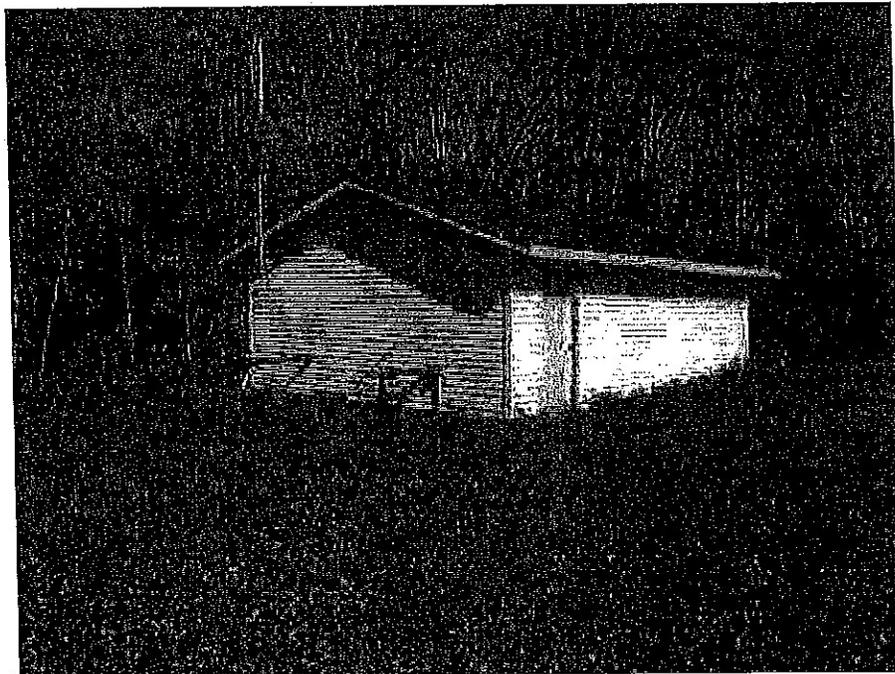

This building is in good condition.

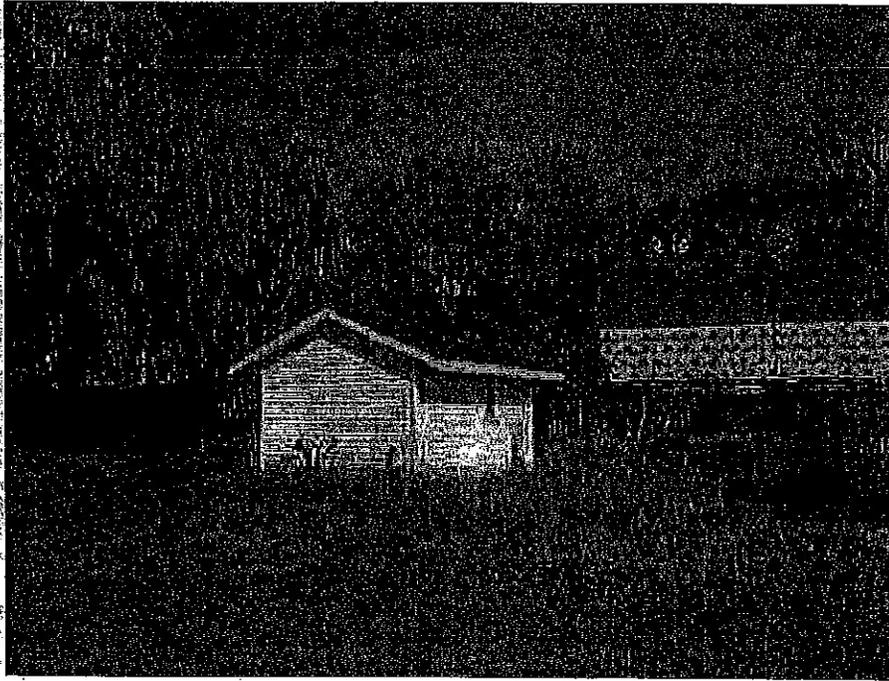

There are three other small pump house buildings located on the course:

#3 of Highlands course

#5 of the Highlands course

#2 of the Tournament course
